

EASTCO have been operating camping safaris in Tanzania, Kenya and Uganda for nearly 20 years. Traditionally our standard or “budget” camping has usually been combined with lodges or tented camps to provide a good quality safari at a reasonable price, still with our well respected and experienced guides of course!

All camping equipment is made in Tanzania with Tanzania tent makers and made from Morogoro Canvas products, large 2.4 meter square, walk-in dome tents, camp cot-style beds with mattresses, cotton sheets towels and woolen blankets. We provide small ‘camping’ pillows bath soap and toilet paper.

Each tent will have a kerosene lamp and fisherman stools as well as a wash basin. With larger groups there is also be a mess tent, a long covered trestle table and fisherman’s stools with green canvas back for each client.

Food is of a good and plentiful standard with specialist dietary requirements catered for with due notice. Breakfast consists of choice of fruits and cereals, as well sausages, bacon, eggs and toast. Dinner is usually a three-course meal. Picnic lunches are supplied.

We use National Park campsites in Serengeti and Ngorongoro which have African long drop toilets and cold showers when water levels permit. When in Mkomazi and Sadaani as well as other off the beaten path locations we also supply shower and toilet tents. We also offer standard camping in private sites in the Serengeti and Ngorongoro and there supply shower and toilets tents as well. Long-drop toilets will be dug in the Conservation Area and a tripod toilet seat provided and a shower tent will be erected.
